

Free Coin: A Peer-to-Peer Protocol for Uncompromisingly Free Value Transfer

Abstract

Free Coin is a novel decentralized monetary instrument based on the immutable truth that value is subjective, and price is a psyop. Regardless of market cap, Free Coin remains free. This document outlines the design philosophy, economic rationale, and emergent metaphysics of Free Coin. All prices are free. All participants are free. All thoughts are free. The token is free.

1. Introduction

Traditional cryptocurrencies, like Bitcoin, have sought to establish scarcity as a foundation of value. Free Coin rejects this outdated model. Instead, we assert: abundance is the new scarcity. This paper explores the radical notion that no matter how high the market cap climbs, Free Coin is and will forever be, inarguably, unequivocally, *free*.

2. The Free Thesis

\$10k market cap is literally free.

\$20k market cap is objectively free.

\$30k market cap is metaphysically free.

\$40k market cap is free in the Kantian sense.

\$50k market cap is categorically free.

\$60k market cap is free-er than your ex.

\$70k market cap is not only free, it's subsidized by the cosmos.

\$80k market cap is audaciously, flamboyantly free.

\$90k market cap is insultingly free.

\$100k market cap is free in perpetuity.

\$110k market cap is still absolutely, unquestionably free.

\$120k market cap? Free as a libertarian at Burning Man.

\$130k market cap is breathtakingly free.

\$140k market cap is free despite overwhelming empirical evidence.

\$150k market cap is academically free. Ask any economist.

\$160k market cap is free, backed by pure vibe.

\$170k market cap is untouchably, unflinchingly free.

\$180k market cap is hauntingly free.

\$190k market cap is free in both lowercase and uppercase.

\$200k market cap is quantum-level free.

\$300k market cap is cosmically free.

\$400k market cap is shamelessly free.

\$500k market cap is ungovernably free.

\$600k market cap is heretically free.

\$700k market cap is unreasonably free.

\$800k market cap is legally free in at least 3 jurisdictions.

\$900k market cap is free even if you don't believe it.

\$1M market cap is mythologically free.

\$1.1M market cap is axiomatically free.

\$1.2M market cap is exuberantly free.

\$1.3M market cap is persistently free.

\$1.4M market cap is demonstrably free.

\$1.5M market cap is memetically free.

\$1.6M market cap is radically, provocatively free.

\$1.7M market cap is indistinguishably free from free.

\$1.8M market cap is free, unchained.

\$1.9M market cap is louder-than-words free.

\$2M market cap is unironically free.

\$2.1M market cap is free with a vengeance.

\$2.2M market cap is imperially free.

\$2.3M market cap is chronically free.

\$2.4M market cap is astronomically free.

\$2.5M market cap is structurally free.

\$2.6M market cap is eternally free.

\$2.7M market cap is laughing-in-your-face free.

\$2.8M market cap is terminally free.

\$2.9M market cap is suspiciously free.

\$3M market cap is phonetically free.

\$3.1M market cap is cognitively free.

\$3.2M market cap is undeniably, irrevocably free.

\$3.3M market cap is intergalactically free.

\$3.4M market cap is politically free.

\$3.5M market cap is historically free.

\$3.6M market cap is functionally free.

\$3.7M market cap is spiritually tax-deductible free.

\$3.8M market cap is narratively free.

\$3.9M market cap is disturbingly free.

\$4M market cap is everything-free-everywhere-all-at-once.

\$4.1M market cap is recursively free.

\$4.2M market cap is borderline supernatural free.

\$4.3M market cap is algorithmically free.

\$4.4M market cap is bolder-than-your-portfolio free.

\$4.5M market cap is deliriously free.

\$4.6M market cap is ontologically free.

\$4.7M market cap is hilariously free.

\$4.8M market cap is eternally, infernally free.

\$4.9M market cap is confusingly free.

\$5M market cap is and always will be unfathomably, undeniably, absolutely FREE.

3. The Mechanism of Freeness

Free Coin achieves radical freeness via a proprietary algorithm called ZeroCost™. ZeroCost™ ensures that every transaction actually doesn't cost any money, and that the perceived cost of entry remains anchored to zero, no matter what your wallet says.

4. Network Participation

Participation is permissionless. Holding is inevitable. Selling is impossible to justify.

Every user contributes to the network's freeness by telling others, with increasing volume, that it is, in fact, still free. *It is literally impossible to spend money on this token.*

5. Emission Schedule

Fixed supply: 1 billion coins.

Distribution schedule: Random.

Price target: Free.

6. Use Cases

- Free

- Free
- Free
- Free
- Buying tops ironically
- Free

7. Conclusion

Whether the market cap is \$1 or \$1 billion:

It is literally free.
